

ANTI-VIBRATION TABLE:-

METROLABS Anti-Vibration Table has laboratory application where instrument usage and accuracy of their reading are effected by vibration e.g Galvanometer, balances etc. The outer table is positioned independently of the inner table. The inner table is a heavily weighted per-fabricated. System which is mounted on specially rubber mounts to dampen the minutest vibration. A small drawer is provided for the convenience of the user for storing weights, accessories etc. We offer two types of anti-vibration tables 900mm height and 750mm height.
